# **AnoSkybox**™

# Top Load 4-Way Instruction Sheet Page 1 of 2

# **Parts**

32 Corner brackets

# Instructions for Assembly

#### Note:

We recommended that two people assemble this AnoSkybox.

#### Step 1a

Slide spine into vertical rail.

#### Step 1b

Slide another vertical rail onto the other edge of spine. Repeat for all vertical rails and spines.

## Step 2

Carefully insert corner brackets into ends of <u>bottom</u> rails, using thumb as shown in illustration. Two brackets per end of each rail. Bracket can bend if forced.

**Detail-** It is important that the corner bracket tension tab faces toward outside of frame. (2b)

## Step 3

Lay out the bottom rails on the floor as they will be configured.

#### (Continued on other side)

# Instructions for Assembly continued

#### Step 4

Assemble the vertical rail assemblies onto the upward facing corner brackets already inserted into the bottom rails. All four brackets should go into the vertical rails at one time.

Note: The last vertical rail will be tensioned. This is normal.

Note: Insert end of spine <u>without</u> the predrilled holes. Holes should remain at the top of the AnoSkybox for hanging.

#### Step 5

Insert corner brackets into ends of split rails, 1 per end. Use thumb as shown in illustration.

#### Step 6

Assemble split rails onto top ends of vertical rails, one inside and one outside of each side of the AnoSkybox.

## Step 7

Insert and change signs through top of each side.

## Step 8

Hang the completed assembly.

Note: Steps 7-9 illustrate a 3-Way AnoSkybox. Assembly is the same for a 4-Way
