

# LaunchPort™ Docking System

## The perfect choice for store associates who need easy access to their iPads®.

LaunchPort is a revolutionary way to mount and charge the iPad. Using magnets and inductive charging (instead of the standard 30-pin connection), the LaunchPort eliminates cords and allows your associates to simply undock the iPad and walk. Once the iPad is returned to its base-station, charging resumes immediately. When docked, the Launchport is at the perfect ergonomic angle to make typing and page browsing comfortable and user-friendly.

- iPad maintains total functionality while charging.
- Full access to buttons and cameras for maximum usage.
- Mini USB port for syncing and charging on the go.

### Color Options\*

Black (BaseStation/Shuttle)  
IP25-0336-B

White (BaseStation/Shuttle)  
IP25-0336-W

\*BaseStation charging system available in brushed aluminum only.
