Multi-store rollouts are a breeze.

No more worries about which cable length to send to which store. With the adjustable cable system, store staff can set the length in-store so you can send the same kit to every location.
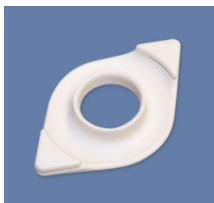

- Signs hang level every time.
- Adjust cable length as many times as needed.
- A full 30" of adjustability per ring. Use more rings for more range.
- Send the same kit to each store — store staff adjusts length in seconds.
- Spider Rings are easily moved up and away from line-of-sight.
- New Centering Jacket holds Ring centered on cable while still allowing full adjustability.

Simply wrap the cable around the Spider™ Ring, and your graphic will be adjusted by 3." Each Ring can hold up to 10 wraps, for a total of 30" of adjustability!
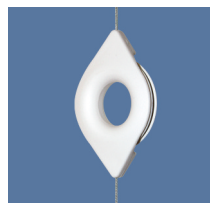

For a more finished look, add our new Spider Ring Centering Jacket. Just place it over the Spider Ring to center the ring on the cable. Keep the same great adjustability with a different look.

16-0018R
